CORE STACK

FRONTEND
TypeScript · React (Hooks, SSR) · Redux · HTML5 / CSS3 · Next.js · React Native · Tailwind · Flutter

BACKEND
Python (Django, FastAPI) · Node.js · REST · GraphQL · PostgreSQL · MongoDB · Redis

TOOLING & DELIVERY
Webpack · Docker · AWS · CI/CD · Gulp · npm / yarn · Git · Linux / macOS · production deployments

TESTING & QUALITY
Unit & E2E testing · TDD · Code review · Long-term maintainability of large codebases

SECURITY
Secure coding · OAuth 2.0 / JWT · Entra ID · SOC2 vendor evaluation · Input validation & schema contracts

LOW-LEVEL / AI
C++ · Chromium · Cursor + Claude · Gemini · RAG / LLM features

LANGUAGES

Italian	Native
Romanian	Native
English	Fluent (C1)
French	Professional (B2)
Spanish · Russian	Conversational

EDUCATION

M.Sc. Software Engineering
Technical University of Cluj-Napoca · 2020–2022

B.Sc. Computer Science
Babeș-Bolyai University · 2014–2017

Alessandro **Paolo Alghisi**

SENIOR FULL STACK SOFTWARE ENGINEER · TYPESCRIPT / REACT / PYTHON

TypeScript · React · Python / Django · PostgreSQL · Docker · Scalable SaaS platforms · Complex workflows · Secure code · Build & test tooling

SUMMARY

Senior full stack engineer with **10+ years** building and owning large, long-lived SaaS products in **TypeScript / React** and **Python / Django** on **PostgreSQL**. Led the platform behind **Bayut.com and Zameen.com** from zero to millions of monthly users, integrating frontend and backend for performance and stability, and shaping architecture for long-term maintainability. A developer first who is strong in frontend — not strictly a frontend developer. 2× Google intern (shipped C++ / JavaScript into Chrome), security-minded (OAuth / Entra ID, compliance platforms, SOC2 evaluations), comfortable owning complex features from design to production.

FIT AT A GLANCE

- ✔ Advanced TypeScript, React, HTML5 / CSS3
- ✔ Webpack, Docker, AWS, production deployments
- ✔ Large codebases, maintainability decisions
- ✔ Secure coding, OAuth 2.0 / JWT, Entra ID
- ✔ Python / Django + PostgreSQL in production
- ✔ Build & test tooling set up and maintained
- ✔ Complex workflows (compliance, release safety)
- ✔ Architecture influence (Chromium, product teams)

EXPERIENCE

Senior Full Stack AI Developer · Raw Geeks — Jan 2026 – Sep 2026
Cluj-Napoca, Romania · On-site

- Owned complex features end to end in **React and TypeScript** with a Node.js backend — from problem definition with product to production release.
- Set up and maintained frontend **build and test tooling** (Gulp pipeline, E2E tests); drove an **Angular-to-React migration** of a large codebase.
- Influenced platform **architecture decisions** (component boundaries, data flow, API contracts); shipped AI features (Gemini translation, copilots).

Senior Full Stack Developer · Complaion **STARTUP** — May 2025 – Dec 2025
Milan, Italy · Hybrid

- Built **TypeScript / React** front ends and backend services on **PostgreSQL** for a regulated **compliance (ISO) platform** — complex multi-step workflows, strict schema contracts, TDD.
- Implemented secure **OAuth integrations** (Google, Microsoft Azure / Entra ID) with least-privilege access to organisational data.

Senior Video & Full Stack AI Consultant (Contract) · Freelance — Sep 2024 – Sep 2025
Remote

- Built a Zoom-like collaboration app in **React / React Native / TypeScript**: Google sign-in, calendar, shared Monaco editor with live multi-user cursors and remote code execution.
- Zoom Video SDK and Cisco Webex POCs; **security (SOC2)**, licensing and scalability evaluations; AEM components (HTL, Java Sling Models, React in AEM).

Full Stack Engineer · Sector Labs (Bayut.com & Zameen.com) — Sep 2017 – Mar 2024
STARTUP
Cluj-Napoca, Romania

- Built the platform behind Bayut.com and Zameen.com — **React, Redux, TypeScript, SSR, Webpack** on **Python / Django** and Node.js services with **PostgreSQL**, MongoDB and Redis on **AWS** — from zero to millions of monthly users.
- Migrated a legacy PHP / Laravel platform to Node.js, Python and React while keeping both in sync; made long-term maintainability calls across a large monolithic codebase.
- Fixed rendering, bundle and runtime bottlenecks on top-traffic pages; raised quality through code review, mentoring and design reviews.

Senior Software Engineer — LoadRunner · Hewlett Packard Enterprise — Feb 2017 – Sep 2017

- Diagnosed client-reported HTTP replay defects in a large C++ enterprise codebase (Wireshark); improved replay reliability ~25%.

Software Engineer Intern · Google — Chrome Team, Kitchener, Canada — Jan 2016 – Apr 2016

- Implemented pinch-to-zoom for Chrome's PDF viewer (C++ / JavaScript, touch events); contributed to Chromium architecture discussions.

Software Engineer Intern · Google — Logs Team, Mountain View, USA — Aug 2016 – Nov 2016

- Built an automated **release-safety workflow** deciding whether a logging policy is safe to ship, integrated with Google's release framework (C++, Python).

Developer Intern · Algotech Solutions · Yardi Systems — Jan 2015 – Aug 2015

- React / jQuery features, Node.js REST APIs and SQL (Algotech); Perl data tooling (Yardi), Cluj-Napoca.

ACHIEVEMENTS

2× Bronze Medal, Romanian National Informatics Olympiad (2013, 2014) · Prizes at Grigore Moisil, ITeam_net and MindCoding contests · 10/10 Informatics on the Baccalaureate · B.Sc. thesis: Raspberry Pi router with an AI-powered ad blocker · Lifelong Linux user.
